

## News

DRG Health Clinic is an independent pain management clinic located in the centre of Doncaster. Through dedication and commitment to delivering the best quality of care, we have grown considerably in the last 3 years both in client numbers and the services we provide. Our expansion has seen an increase in staffing from a team of 3 to around 12 consisting of Consultants in Pain Management, Orthopaedic Surgeon, GPs, Radiographers and Health Care Assistants, all supported by the newly appointed Practice Manager and Admin Team.

We received approval from the Care Quality Commission (CQC) and have received a “good” rating for our services on inspection in 2020. In December we became an approved provider for BUPA, CIGNA, Healix and WPA. In 2019 we introduced more advanced services including x-ray and fluoroscopy services, injection therapy and lidocaine infusion for Fibromyalgia.

Like many other businesses and healthcare providers, 2020-21 has been a challenging time with the outbreak of the COVID-19 pandemic. Nevertheless, we are proud to support local NHS services whilst continuing to provide much needed treatment to our self-pay patients throughout. 2020 was the year we commenced ultra-sound guided injection and Botox injections for headaches.

We have come a long way since opening our doors in 2018 and are very excited about our future plans.

As the premier independent provider of pain management services in the local area, our aim is to continue to build on our good reputation and further progress to a fully holistic pain management and spinal service. We are currently looking to increase our capacity for GP appointments as we recognise that this is a high demand area. We are also able to offer clinic rooms at a sessional/day rate for healthcare professionals.

We are very proud of what we have achieved to date and the many patients we have helped. These are still challenging times, but the future is bright. We look forward to bringing you an update on our progress!
